Competitive Contract Services

Consultancy for Catering, Cleaning and Facilities Management

Contract Tendering

Competitive Contract Services is an approachable and friendly consultancy practice. We are totally customer focussed in that we tailor our solutions to meet the needs of you, our client. We don't impose off the shelf solutions - we simply listen and then work closely with you to achieve your goals.

Contract Tendering

We support all types of organisations through the process of tendering catering, cleaning, grounds maintenance and other Facilities Management services.

We can advise on the procurement options available to you within the current EU rules. Working with you to specify your service requirements and selection criteria we can ensure that the process runs smoothly and meets your budget and quality targets.

We can also advise you if you want to extend an existing contract, renegotiate the terms or price, terminate a contract or transfer services in-house.

Service Review

We review your in-house contracted catering or cleaning services and make recommendations to that bring you closer to your service goals, whether they be quality improvements or financial savings. We can work with your contractor to achieve the improvements you want to see.

In circumstances where your contract is not delivering what you need we can advise on your options for the way forward.

Supporting In-House Catering Operations

Schools that operate in-house catering services sometimes need an outside view to ensure that they keep pace with the latest products and service trends, legislation and innovations.

We can review your services and make recommendations to achieve the individual objectives and vision of each school, offering professional advice that focuses on Ofsted inspection criteria and the school's aspirations for the catering service.

Services include policy development, budget planning, communications with parents, student surveys, staff recruitment and supplier management. We advise on investment in equipment, refurbishment of facilities, cashless systems or electronic tills that supply improved sales mix information.

Catering Control Software

We believe in giving catering managers the right tools to manage what is in effect a small business. All our schools use **Optimum Control** software for purchasing, recipe costing and stock control. Some of the managers had never used a computer before but now they successfully manage and monitor their own trading accounts and are able to effectively control all their operating costs, including labour.

Our catering control software is available as a **package including initial training**. Priced from £990.00 + vat.

Local Schools Support Programme

Our local schools programme began when we assisted a local school with a major refurbishment programme and we were asked to continue our involvement on the basis of an annual hands-on management support contract. Since then the service has grown through recommendation.

We work closely with the catering teams to achieve the individual objectives and vision of each school, offering professional advice and hands-on practical support to the catering team in menu planning, marketing and promotions, financial control, training, supplier management, product sourcing, service layouts, customer care and presentation.

Our local schools service takes the worry out of compliance with food safety and other legislative requirements. We provide the required documentation and undertake periodic compliance audits and training.

This service is available in east Kent only.

Contact Us

If you would like to meet us to discuss how we can assist you, please call Ruth Hutt and make an appointment for an informal chat. No pressure!
